## What happened @ CMO

### Fun and Fitness on the Menu

The last two Health Days of 2024 were held in Ghana and Tunisia.

In Ghana, over 100 participants gathered at Shama Golf Club, thanks, in part, to sponsorship from our local transporters. The day began with an invigorating aerobics session, followed by a volleyball tournament. Other activities included snooker, table tennis, and a penalty shootout so there was something for everyone to enjoy on the day.

Carmeuse Tunisia's Health Day started with a session led by a nutritionist. After a delicious, well-balanced lunch, it was time to head out for a fun bicycle ride. The day struck a perfect balance between learning and physical activity, leaving everyone feeling energized and informed.

### Meet Gabriel Ngosa

Gabriel was a general worker for a mining contractor, responsible for garden tasks and cleaning workshop floors. Today, he is studying electrical engineering thanks to a scholarship from Handyman's Lime, Zambia. Gabriel's recent exam results included an A in mathematics – congratulations and good luck for your second year!

### CMO Shines at Recent Awards

Congratulations to Carmeuse Ghana for their outstanding achievements at the 10th Ghana Mining Industry Awards, where they were honoured as the 1st runner up for Best Performer in Local Manufacturing of Mine Inputs and 2nd runner up for Best Performer in Mine Supplies & Support Services.

Additionally, Carmeuse in West Africa was recently recognized for exemplary safety standards at the Endeavour Supplier Awards.

Thanks for reading.
